Good day!

Hi ma'am Chit,

This is about the meeting about the SO management system, I am sharing the finalized workflow for Dispensing and Trade Accounts. The discussion was very productive, and we appreciate the valuable inputs from Ma'am Eds, Ma'am Marijo and her team (via Phone Call).

Regarding SGF-COD, it has been decided that this will remain a manual process for now. We will look into automating this once the pilot runs for both dispensing and trade accounts are operating smoothly.

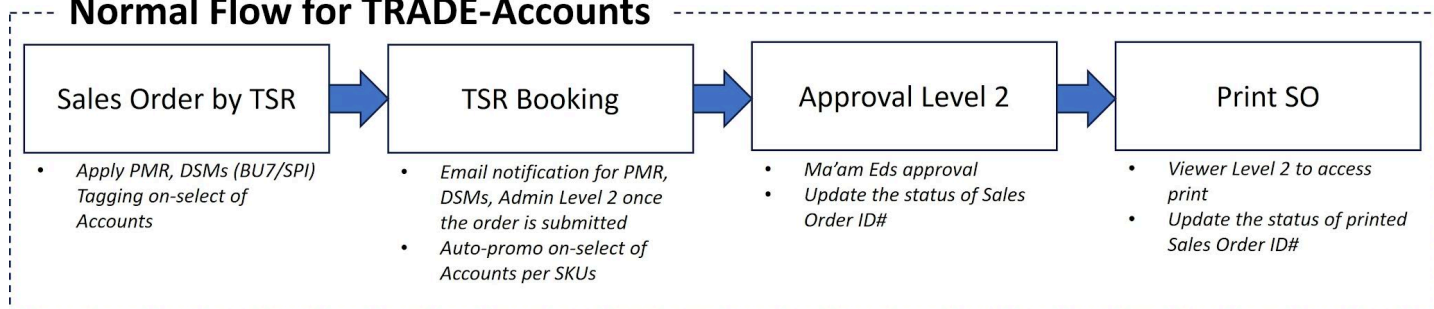

Ma'am Eds will be providing the following data:

- List of Accounts with tagging for PMR, TSR, DSM (PSI) and DSM (BU7)
- History of accounts promotion per SKUs

Below is the diagram flow that we finalized.

DIAGRAM FLOW FOR TRADE ACCOUNTS:

Normal Flow for TRADE-Accounts

Special Flow for TRADE-Accounts

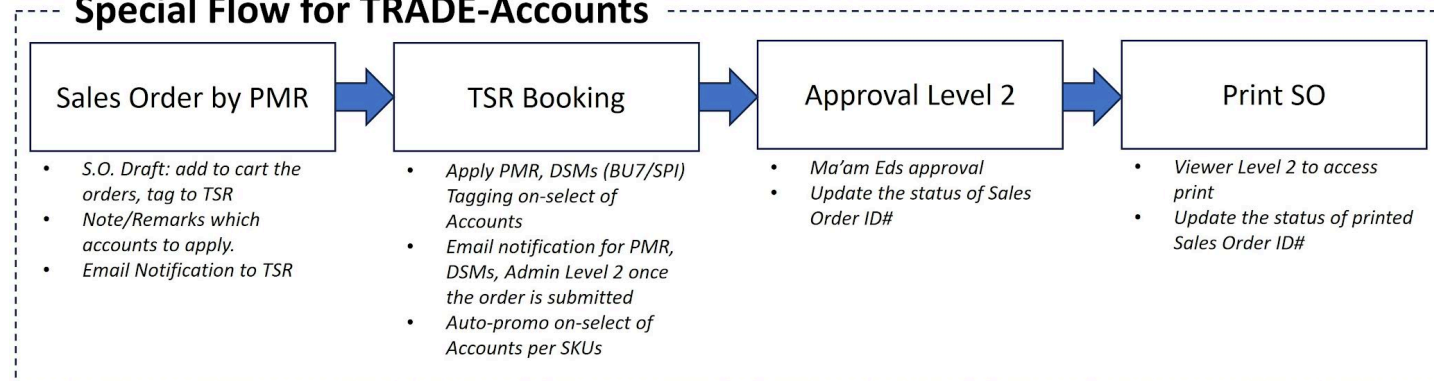

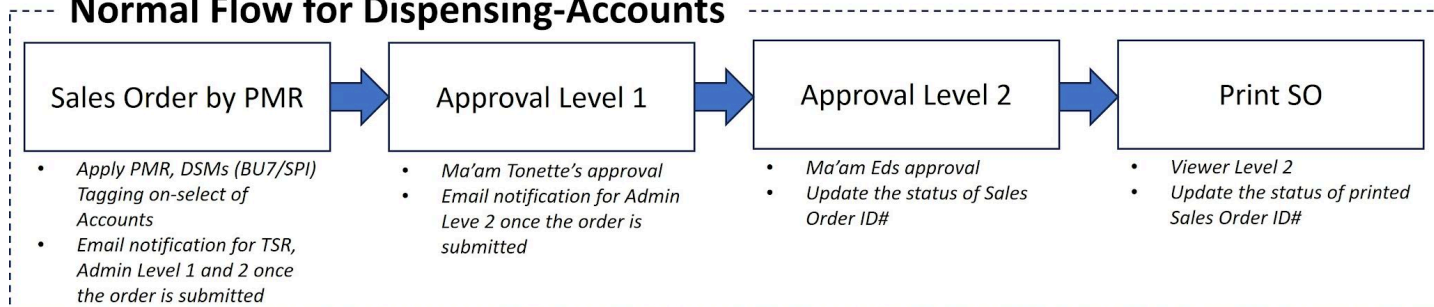

DIAGRAM FLOW FOR DISPENSING ACCOUNTS:

Normal Flow for Dispensing-Accounts

NOTE:

- PMRs can only access the Dispensing Accounts.
- TSRs can only access the TRADE Accounts

- In special-flow "SO(PMR)" TRADE Accounts, PMR can only draft the orders into cart.

Next Step:

- We expect to release these updates within the next 1 to 2 days.
- Creating dummy accounts for TSR and DSM-BU7 for testing.
- Visibility: Implementing page views for counterparts to track submitted orders and statuses (TSR and PMR).

Stay safe and God Bless!

Benedic P. Cater
